Portfolio

https://anosh-raza.github.io/its-anosh/

I'm a dynamic frontend developer that specializes in creating effective sales funnels by combining UI/UX concepts with organizational understanding. My passion is improving SAAS products by using my skills in design and analytical thinking to provide value and innovation for the system.

Experience

Marten Solutions

Dec 2023 - Present

- Translated client requirements into functional and visually appealing designs, enhancing product appeal. Collaborated closely with backend development teams to ensure seamless integration.
- Proficient in Shopify development, WordPress development, and Zoho CRM customization.
- Designed frontends using React and Next.js.

DG CONCEPTS

Sep 2022 - Sep 2023

- Specialized in dynamic design techniques, employing custom methods like ACF, PHP, and jQuery for WordPress theme customization. Translated PSD designs into responsive HTML, integrating SEO principles.
- Proficient in popular page builders such as Elementor, Divi, and WPBakery for streamlined development workflows. Ensured seamless integration of custom designs with page builder functionalities.
- Extensive experience in Shopify, including theme customization and resolution of backend format errors. Developed custom sections within Shopify themes using Liquid, ensuring enhanced functionality.

DZN SOLUTIONS

Jan 2022 - Sep 2022

- Proficient in building websites using popular builders such as Elementor and WPBakery.
- Implemented WordPress theme customization using HTML and CSS for tailored and visually appealing designs.
- Translated PSD designs into responsive HTML, ensuring seamless integration of SEO principles and a visually appealing user interface.
- Successfully resolved hosting errors to ensure seamless functionality and contribute to achieving user growth goals.
- Extended skills to WIX customization, adapting to diverse platforms and ensuring a consistent level of quality in design and user experience.
