Portfolio

https://anosh-raza.github.io/its-anosh/

I'm a UI/UX developer that specializes in creating effective sales funnels by combining design concepts with organizational understanding. My passion is improving SAAS products by using my skills in design and analytical thinking to provide value and innovation for the system.

Experience

MARTEN SOLUTION

Dec 2023 - Present

- Interpret ideas into user flows, wireframes, and prototypes to facilitate user-friendly experiences.
- Recognize and address design challenges to assist users in solving issues effortlessly.
- Implement customized application controls and visual elements.
- Transform intricate data into straightforward visual representations like graphics and charts.
- Develop quick prototypes for validating design ideas with stakeholders and users.
- Contribute to establishing a library of user experience patterns to ensure consistency across various products.
- Utilize HTML, CSS, JavaScript, incorporating elements of ReactJS and NextJS, along with Figma and XD for design purposes.

DG CONCEPTS

Sep 2022 - Sep 2023

- Collaborated with a small, close-knit team during the design ideation phase.
- Translated game design concepts into clear user flows and wireframes.
- Created interactive prototypes to showcase user flows and complex functionality.
- Designed the look and feel of the user interface (UI) to maintain consistent aesthetic and functionality across the product.
- Provided mockups of new features and screens, iterating as needed.
- Worked closely with the engineering team to implement designs.
- Participated in user research and incorporated findings to enhance the UI.
- Utilized HTML and CSS elements in conjunction with Figma and XD for design tasks.

DZN SOLUTIONS

Jan 2022 - Sep 2022

- Proficient in website development using HTML and CSS. Experienced in translating PSD designs into responsive HTML, ensuring seamless integration of SEO principles and a visually appealing user interface.
